

APPRATA ENGINEERING & TECHNICAL SERVICES LIMITED

Quality Assurance & Quality Control

Since the establishment of APPRATA ENGINEERING & TECHNICAL SERVICES's business activities, the delivery of superior quality has always set the company apart. This achievement has been realized through strict conformity to applicable national and leading international standards.

- APPRATA ENGINEERING & TECHNICAL SERVICES's quality management system is designed and rigorously implemented to meet industry standards.
- To meet this unconditional demand for quality, APPRATA ENGINEERING & TECHNICAL SERVICES depends on both its highly qualified personnel and its first-class construction materials.
- Having its own production facilities ensures consistency and reliability in material production and testing.
- Quality of material and works are guaranteed through leading quality management systems, and all materials used meet international standards.
- APPRATA ENGINEERING & TECHNICAL SERVICES has a proactive approach to project inputs; the company provides clients with optimized solutions specific to the project constraints and conditions.
- APPRATA ENGINEERING & TECHNICAL SERVICES puts continual emphasis on research, development and innovation, across all areas and functions of works, including production and procurement.
